

Swachh Bharat Abhiyan

A Clean India Movement

Launched on October 2, 2014, India's largest-ever cleanliness campaign — a mission to transform sanitation, hygiene, and civic behavior across 1.4 billion lives.

Genesis of a Nation's Vision

Before 2014, **over 600 million Indians** practiced open defecation. India accounted for nearly **60% of the world's open defecation**, contributing to disease, child mortality, and economic loss.

Sanitation Crisis

Only 39% of rural households had toilet access at launch

Health Burden

Diarrhea and waterborne diseases caused 140,000 child deaths annually

Economic Cost

Poor sanitation cost India ~\$54 billion per year in lost productivity

Objectives: A Multifaceted Approach

The mission was built on four interconnected goals designed to create lasting behavioral and infrastructural change across urban and rural India.

1

Eliminate Open Defecation

Construct household and community toilets to achieve Open Defecation Free (ODF) status nationwide

2

Improve Solid Waste Management

Establish systems for waste collection, segregation, and scientific disposal in cities and villages

3

Change Behavioral Norms

Drive lasting behavioral change through awareness campaigns, school programs, and community mobilization

4

Build Sanitation Infrastructure

Upgrade drainage, water supply, and public sanitation facilities across urban and rural areas

Key Pillars of the Mission

Three Interlocking Pillars

The mission's architecture rests on three interlocking pillars — each reinforcing the others to create a comprehensive sanitation ecosystem.

- **Sanitation:** Toilet construction and ODF certification
- **Hygiene:** Behavior change, handwashing, menstrual health
- **Waste Management:** Solid, liquid, and plastic waste systems

Swachh Bharat Urban

URBAN MISSION

Targeting **4,041 statutory towns**, the urban mission focused on eliminating open defecation, managing municipal waste, and building civic pride.

Solid Waste Management

Door-to-door collection, source segregation, and scientific processing of municipal solid waste

Toilet Construction

Community and public toilets built in slums, markets, and transit hubs

Swachh Survekshan

Annual cleanliness survey ranking cities, driving competition and accountability

Swachh Bharat Rural

RURAL MISSION

The rural mission targeted **180 million households** across 600,000+ villages, making sanitation a community-driven movement.

Individual Household Latrines

Subsidized toilet construction for BPL families and vulnerable households

School Sanitation

Separate toilets for girls in all government schools to improve enrollment

Water & Drainage

Integration with Jal Jeevan Mission for sustainable water access

Impact & Achievements

By 2019, the mission achieved historic milestones that reshaped India's sanitation landscape.

110M+

Toilets Built

Household toilets constructed across rural and urban India

600K+

Villages ODF

Villages declared Open Defecation Free by 2019

100%

ODF Declaration

India declared ODF on October 2, 2019 — ahead of schedule

\$20B+

Investment

Total government and state expenditure on the mission

Challenges & Roadblocks

Hurdles to Sustained Progress

Despite remarkable achievements, the mission faces ongoing challenges in maintaining gains and deepening impact.

Behavioral Relapse

Some communities reverted to open defecation post-construction

Waste Infrastructure Gaps

Many cities lack processing plants for segregated waste

Funding & Maintenance

Sustaining toilet usage requires ongoing investment and monitoring

The Way Forward

Swachh Bharat Mission 2.0 (2021–2026) builds on Phase I with deeper focus on sustainability, inclusivity, and technology.

The next phase emphasizes **ODF Plus** status, **biomethanation**, **plastic waste reduction**, and empowering *Swachhagrahis* (cleanliness ambassadors) at the grassroots level.

A Swachh Bharat, A Prosperous India

"Cleanliness is not a one-time campaign. It is a way of life." — Narendra Modi

Health

Reduced disease burden and child mortality

Economy

Billions saved in healthcare and productivity

Dignity

Safety and dignity restored for women and children

Legacy

A behavioral revolution for future generations
